PROFILE

Technical Project and Product Manager with 10+ years of experience driving SaaS, e-commerce, and app projects from ideation to successful deployment. Uniquely positioned at the intersection of technical execution and business strategy, bridging the gap between software engineers and enterprise stakeholders. Passionate AI Champion skilled in leading proof-of-concepts with emerging tools to accelerate transformation and enhance quality across engineering pipelines.

KEY SKILLS

- **Software Development:** C#, Python, AWS, GitHub, CI-CD pipelines, Databricks, RAG, AI.
- **Data Analytics & Visualization:** SQL, Excel, Tableau, PowerBI, Looker, Seaborn.
- **Soft Skills:** Agile/Scrum, Product Ownership, Stakeholder collaboration, cross-functional communication, tech to business bridge, conflict resolution, mentorship.
- **Languages:** English (Native), Spanish (Native), Italian (C2), German (B2).

EXPERIENCE

Technical PM & AI Builder (Freelance) | Independent - Berlin, Germany

May 2025 – Present

- Led proof-of-concepts with emerging AI tools for clients, evaluating fit, demonstrating value, and mitigating risks.
- Designed human-AI collaboration patterns by integrating LLMs and data pipelines that empower stakeholders to leverage agentic workflows safely.

QA Manager / Technical Product Owner | Ubisoft Kolibri Games - Berlin, Germany

Sep 2021 – Apr 2025

- Managed the integration of Automation and Machine Learning SDKs within a live, massive-scale app environment improving automated testing.
- Guided production decisions by building Looker Dashboards and SQL queries to analyse user and tech data, contributing to a \$2M grossing month and reducing ANR by 75%.
- Acted as Release Owner, managing complex feature deployments within CI-CD pipelines while executing minor bug fixes in Python.

Technical Project Manager / SGSCO - Hull, UK

Jan 2019 – Sep 2021

- Managed 50% of the team's production of 3D modeling pipelines for VIP accounts, bridging the gap between customer expectations and team action.
- Innovated workflows through data analysis, cutting delivery times by 25% and reducing the client Quality Control phase from 3 days to 1 day.
- Delivered internal training on Agile project management and analytics practices to accelerate the onboarding of new technical team members.

Product Manager (Freelance) / CashU, FLMotors, Findcourse.com - Dubai, UAE

Nov 2016 – Jan 2019

- Aligned technical and commercial stakeholders to roll out a real-time Machine Learning fraud-prevention tool for the finance sector.
- Restructured complex data taxonomies for marketing campaigns, analyzing the economic impact of internal process improvements.
- Built long-term customer relationships while guiding procurement and supply team logistics chain to effectively expand on 12 new markets.

Technical Project Manager / eKomi - Berlin, Germany

Nov 2014 – Nov 2016

- Owned the end-to-end development of custom API integrations and feedback analytics products on cloud backends.
- Coordinated stakeholders and cross-functional teams, utilizing Jira and Salesforce CRM.
- Managed relationships for B2B clients, aligning sales, legal and financial teams on product roadmap.

AI PROJECTS & PROTOTYPING

- **Customer Churn Predictor:** Engineered an XGBoost pipeline integrated with Claude AI to automate personalized retention emails and content generation.
- **Enterprise RAG Agent:** Built an autonomous chatbot using LangGraph and Gemini to query and generate accurate content from complex documentation.
- **LeukoVision (Computer Vision):** Engineered a deep learning platform utilizing CNNs to classify and analyze complex visual data.

EDUCATION & CERTIFICATIONS

- Data Science & AI – Sorbonne University (2025)
- Electronic Engineering – Politecnico di Milano (2010)
- AWS Certified Cloud Practitioner
- SAFe Certification
